Summary

Full stack web developer with extensive programming experience in meeting challenging technical support needs. Earned a certificate in full stack development from the University of Connecticut expanding my skills adding JavaScript, Express.js, React.js, REST API, and CSS. Analytical troubleshooter who delivers timely effective client solutions by assessing and prioritizing business change requests together with the project manager and business stakeholders. Results driven team leader who achieves successful outcomes efficiently through team member assessment and proper alignment of responsibilities by working with direct management.

Technical Skills

Languages: HTML5, CSS3, JavaScript, jQuery, Bootstrap, Express.js, React.js, Node.js, C#, XML, XSLT, VB.net

Applications: TFS, SQL Server, MongoDB, MySQL, GIT, IIS, Heroku

Relevant Experience

SENIOR DEVELOPER

OCT 2006 – Present

THE HARTFORD

STAMFORD, CT

- Coordinate & supervise all activities related to program design, development, & implementation using scrum and agile methodologies.
- Code/Test/Refine applications for C#.net & VB.net data feeds from XML to the AS/400.
- Managed five offshore consultants responsible to code according to company guidelines.
- Provide strategies to improve applications feeding the AS/400.
- Reduced processing time from thirty hours to three hours.
- Work with external vendors to create XML files for data capture.
- Maintain AS/400 process for web-service communications.
- Test and balance all data feeds from the vendor's bordereau.
- Maintain and deploy ASP.net applications.
- Provide internal and external client support.

Key Accomplishments

- Received seven awards for excellent service.
- Received a quarterly award for excellent service

Projects

unit-4-game | <https://github.com/vordawg/unit-4-game> | <https://vordawg.github.io/unit-4-game/>

- A Star Wars RPG game that allows you to choose a character to defend against three attackers.
- I am the sole author of the application.
- Utilized JavaScript and Bootstrap.

clicky game | <https://github.com/vordawg/clickygame> | <https://clickygameiw.herokuapp.com/>

- A memory game designed to challenge the user to click all 12 images without clicking the same one twice.
- I am the sole author of the application.
- Utilized React, Express, Path, JavaScript and Bootstrap.

bitcoin cost estimator | <https://github.com/vordawg/group-project-1> | <https://vordawg.github.io/group-project-1/>

- An application that uses the mining difficulty to calculate an estimate of the electrical cost to mine 1 Bitcoin.
- This was a group project. I was responsible for the chaining the API calls and address input verification.
- Utilized Web API, JavaScript and Bootstrap.

repomaster | <https://github.com/vordawg/project2> | <https://repomaster2019.herokuapp.com/>

- An application that allows users to search through Github for projects using the Github API.
- This was a group project. I was responsible for the API and displaying the search results on the screen.
- Utilized Node, Express, MySQL, JavaScript and Bootstrap.

Education

Bootcamp Certificate: University of Connecticut School of Engineering, Stamford, CT January 2020

Bachelor of Arts in Economics: University of Connecticut, Storrs, CT May 2004
